

OFFICIAL RESPONSES TO VENDOR QUESTIONS
RFP-2017-OQAI-02-CONSUM

No.	Question	Answer
1.	<p>Section 3.2.1.5 If response rates are running below the required rate (62% and 25%), additional sample will more than likely result in increasing the number of completed interviews to reach the desired Confidence Interval and Margin of Sampling error rather than increase the response rates. Is the goal with this section to ensure there are an adequate number of completes for each disability type, or is the focus more on achieving the desired response rate?</p>	<p>The Vendor shall complete the number of surveys per population in order to achieve the response rates in the Table 1, RFP Section 3.2.1.2.</p>
